Notes to the Condensed Interim Consolidated Financial Statements
For the three months ended March 31, 2018 and 2017
(Stated in \$Cdn)

NOTE 1 – NATURE OF OPERATIONS AND GOING CONCERN

Cresval Capital Corp. (the “Company”) was incorporated under the laws of the Province of British Columbia, Canada on July 23, 2001. The Company is an exploration stage company engaged in the acquisition and exploration of base and precious metals. The consolidated financial statements for the period ended March 31, 2018 include the accounts of Cresval Capital Corp. and its wholly-owned subsidiary, 1151009 BC Ltd. a company incorporated under the laws of British Columbia, Canada.

The Company’s head office and principal place of business is Suite 900, 570 Granville Street, Vancouver, BC, Canada.

The Company holds interests in exploration properties in British Columbia, Canada, and has not yet determined whether the properties contain ore reserves which are economically recoverable. The underlying carrying value of the mineral properties interests and related deferred exploration and evaluation expenditures is dependent upon the existence of economically recoverable reserves, confirmation of the Company’s interest in the mineral claims, its ability to obtain necessary financing to complete the exploration and evaluation, and future profitable production or proceeds from the sale of all or an interest in its mineral claims.

These financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at March 31, 2018, the Company had a working capital deficiency and has incurred ongoing losses. The Company has not yet realized any revenues from its operations. It will be required to raise new financing through the sale of shares or issuance of debt to continue with the exploration of its mineral properties. Although management intends to secure additional financing as may be required, there can be no assurance that management will be successful in its efforts to secure additional financing or that it will ever develop a self-supporting business. These financial statements do not give effect to any adjustments which would be necessary should the Company be unable to continue as a going concern and thus be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in these financial statements. These material uncertainties may cast significant doubt on the Company’s ability to continue as a going concern.

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES

Statement of Compliance with International Financial Reporting Standards

These condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting (“IAS 34”) as issued by the International Accounting Standards Board (“IASB”). Selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since the last annual consolidated financial statements as at and for the year ended December 31, 2017. These condensed consolidated interim financial statements do not include all of the information required for full annual financial statements prepared in accordance with International Financial Reporting Standards (“IFRS”).

The financial statements were authorized by the Board of Directors of the Company May 15, 2018.

CRESVAL CAPITAL CORP.

Notes to the Condensed Interim Consolidated Financial Statements

For the three months ended March 31, 2018 and 2017

(Stated in \$Cdn)

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES (Continued)

Basis of measurement

The condensed consolidated interim financial statements are prepared on the historical cost basis, except the following assets and liabilities which are stated at their fair value: financial instruments classified as fair value through profit and loss (“FVTPL”), financial instruments classified as available for sale and cash settled stock-based compensation plans. Assets held for sale are valued at the lower of their carrying amount and fair value less costs to sell.

The significant accounting policies for the quarter are consistent with those disclosed in the audited annual financial statements for the year ended December 31, 2017. The accompanying interim financial statements should be read in conjunction with the Company’s audited financial statements for the year ended December 31, 2017.

Use of estimates and judgments

The preparation of the condensed consolidated interim financial statements in conformity with IFRS requires management to make estimates, judgments and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed consolidated interim financial statements, significant judgments made by management in applying the Company’s accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as at and for the year ended December 31, 2017.

New standards, interpretations and amendments not yet effective:

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for accounting periods beginning after January 1, 2018 or later periods. The following new standards, amendments and interpretations that have not been early adopted in these financial statements, are not expected to have a material effect on the Company’s future results and financial position:

Effective for annual periods beginning on or after January 1, 2018:

IFRS 9, Financial Instruments – Classification and Measurement. IFRS 9 is a new standard on financial instruments that will replace IAS 39, Financial Instruments: Recognition and Measurement.

IFRS 9 addresses classification and measurement of financial assets and financial liabilities as well as de-recognition of financial instruments. IFRS 9 has two measurement categories for financial assets: amortized cost and fair value. All equity instruments are measured at fair value. A debt instrument is at amortized cost only if the entity is holding it to collect contractual cash flows and the cash flows represent principal and interest. Otherwise it is at fair value through profit or loss.

The impact of adoption is expected to be increased disclosure.

(Stated in \$Cdn)

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES (Continued)

Effective for annual periods beginning on or after January 1, 2019:

IFRS 16, Leases. IFRS 16 specifies how an IFRS reporter will recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17. The extent of the impact of adoption has not yet been determined.

Accounting pronouncements not yet effective

Other accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or not expected to have a significant impact on the Company's financial statements.

During the period ended March 31, 2018, the Company issued 525,000 common shares upon exercise of 525,000 incentive stock options for gross proceeds of \$26,250.

Fiscal 2017

During the period ended March 31, 2017, the Company completed a private placement of 750,000 units for consideration of \$0.05 per unit for gross proceeds of \$37,500.

During the year ended December 31, 2016, the Company completed a shares-for-debt settlement by issuing 1,146,930 common shares to settle \$68,816 of outstanding debt.

(c) Share-based compensation

The Company has a stock option plan under which the Board of Directors may grant options to directors, officers, other employees and key consultants.

Under the plan, the number of shares reserved for issuance pursuant to the exercise of all options under the plan may not exceed 10% of the issued and outstanding common shares on a non-diluted basis at any time. The options expire not more than five years from the date of grant, or earlier if the individual ceases to be associated with the Company, and vest over terms determined at the time of grant.

No options were granted during fiscal 2018.

NOTE 8 – FINANCIAL INSTRUMENTS

The Company's financial instruments are exposed to certain financial risks, credit risk, liquidity risk and market risk.

a) *Credit Risk*

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

The Company manages credit risk, in respect of cash, by maintaining the majority of cash at high credit rated Canadian financial institutions. As at March 31, 2018, the Company had cash of \$116,875 that exceeded the amounts covered under federal deposit insurance.

b) *Liquidity Risk*

Liquidity risk is the risk that the Company will encounter difficulty in satisfying financial obligations as they become due. The Company manages its liquidity risk by forecasting cash flows required by operations and anticipated investing and financing activities. The Company has cash at March 31, 2018 in the amount of \$216,875 in order to meet current liabilities of \$350,333.

The Company will be required to raise debt or equity in order to meet its ongoing operating obligations.

c) *Market Risk*

Market risk consists of interest rate risk, foreign currency risk and other price risk. These are discussed further below.

Interest Rate Risk

Interest rate risk consists of two components:

- (i) To the extent that payments made or received on the Company's monetary assets and liabilities are affected by changes in the prevailing market interest rates, the Company is exposed to interest rate cash flow risk.
- (ii) To the extent that changes in prevailing market rates differ from the interest rate in the Company's monetary assets and liabilities, the Company is exposed to interest rate price risk.

Management considers the interest rate risk to be minimal.

CRESVAL CAPITAL CORP.

Notes to the Condensed Interim Consolidated Financial Statements
For the three months ended March 31, 2018 and 2017
(Stated in \$Cdn)

NOTE 8 – FINANCIAL INSTRUMENTS (Continued)

c) *Market Risk (Continued)*

Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates.

The Company is not exposed to foreign currency risk.

Price Risk

Price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from interest rate risk or foreign currency risk. The Company is not materially exposed to other price risk.

d) *Classification of Financial instruments*

The Company provides information about its financial instruments measured at fair value at one of three levels according to the relative reliability of the inputs used to estimate the fair value.

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company has valued its cash using Level 1 inputs as at March 31, 2018. The fair value of the Company due to related parties and trade and other payables approximate their carrying values because of the short-term nature of these instruments.

NOTE 9 – CAPITAL MANAGEMENT

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration of its properties and to maintain flexible capital structure for its projects for the benefit of its stakeholders. In the management of capital, the Company includes shareholders' equity (deficiency).

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares or debt. Management reviews the capital structure on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company is not subject to externally imposed capital restrictions.
